### **RAPPEL : Méthodologie de l'enquête FRANCE DETAIL DRIVE GMS**

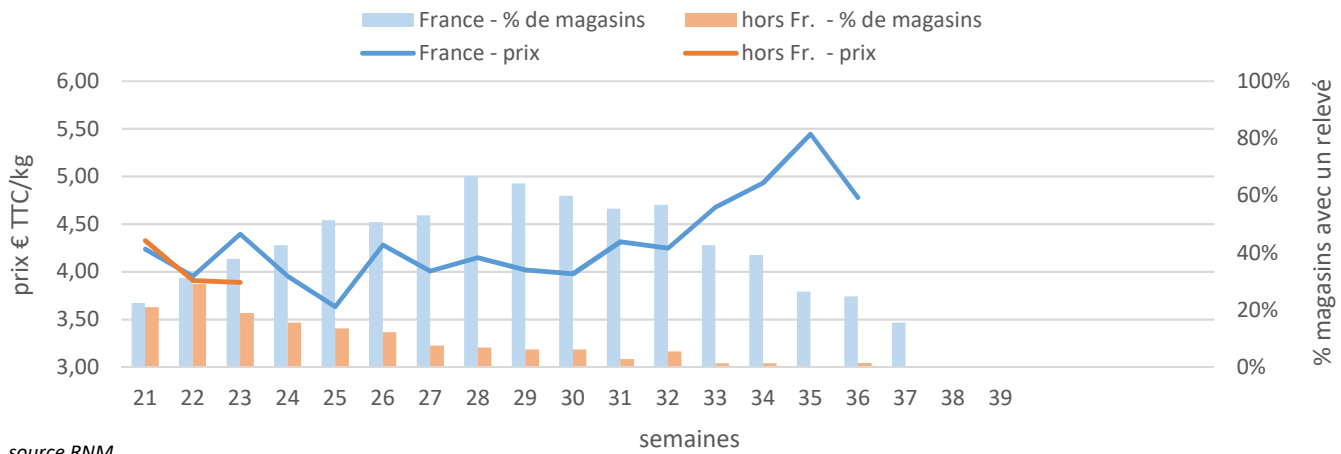

Enquête temporaire, réalisée dans un contexte particulier de crise sanitaire, d'un échantillon de sites de vente « drive » pouvant être rattachés à des magasins GMS (hors hard-discount) habituellement enquêtés par le RNM. Les prix sont diffusés pour les libellés lorsque le nombre de relevés est supérieur ou égal à 25 (seuil minimum de représentativité) sur, au minimum, 25 sites différents.

La taille de l'échantillon varie chaque semaine, elle est précisée dans chaque publication.

Les libellés enquêtés sont en nombre restreint, en raison de disponibilités limitées et de gammes traditionnellement plus réduites de produits frais en drive par rapport aux points de vente physiques.

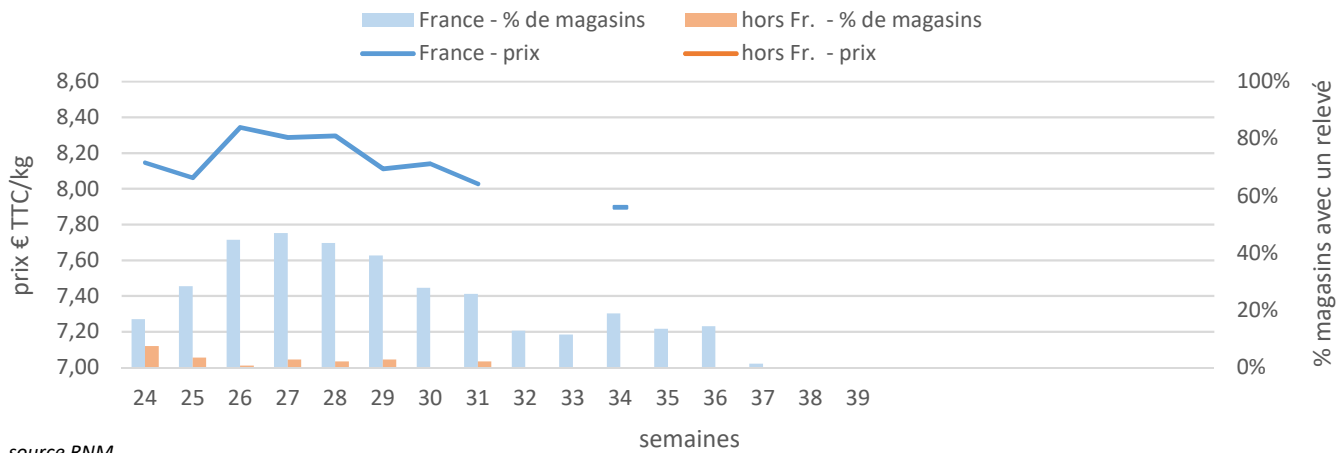

Les résultats de cette enquête, présentés dans cette publication sous forme de graphiques, ne sont en aucune façon comparables avec ceux de l'enquête détail GMS du RNM qui était publiée jusqu'en semaine 11.
